SUMMARY

Computer Science and Engineering graduate with hands-on experience in machine learning, and full-stack web development. Built and deployed applications involving recommendation systems, databases, REST APIs, search, and AI-powered solutions. Seeking an entry-level Software Engineer role focused on developing reliable and scalable software applications.

EDUCATION

Techno Main Salt Lake B.Tech in Computer Science and Engineering CGPA: 7.44	Kolkata, West Bengal 2022 – 2026
Baradongal R.N Institution Higher Secondary (Class XII), WBCHSE Score: 87.6%	Hooghly, West Bengal 2022
Baradongal R.N Institution Secondary (Class X), WBBSE Score: 92%	Hooghly, West Bengal 2020

TECHNICAL SKILLS

Programming Languages: Python, Java, C, SQL, JavaScript
Web Development: HTML, CSS, JavaScript, Flask, REST APIs
Databases: SQLite, SQLAlchemy, Relational Database Concepts
Machine Learning: Scikit-learn, Pandas, NumPy
Developer Tools: Git, GitHub, VS Code
Core Computer Science: Data Structures and Algorithms, Object-Oriented Programming, DBMS

PROJECTS

- MovieMind – Movie Recommendation Web Application** [Live Link](#)
- Developed a Flask-based full-stack movie recommendation application using Python, Pandas, Scikit-learn, HTML, CSS, and JavaScript.
 - Implemented a content-based recommendation pipeline using movie metadata and cosine similarity to generate relevant movie recommendations.
 - Built SQLite-backed user authentication and session management with login, signup, profile, liked movies, and watchlist functionality.
- Explore India – AI-Powered Travel Planning Web Application** [Live Link](#)
- Built a Flask full-stack travel platform using Python, SQLite, HTML, CSS, and JavaScript to organize states, destinations, travel information, and location-based content.
 - Developed REST endpoints for destination discovery and search, including exact, partial, and content-based matching across destination and state data.
 - Integrated the Gemini API to extract travel preferences and rank database-backed destinations based on trip duration, month, budget, interests, and traveler type.
- Modern Portfolio Website** [Live Link](#)
- Designed and developed a responsive personal portfolio website using HTML, CSS, and JavaScript to showcase projects, technical skills, education, and achievements.
 - Implemented interactive UI components, smooth animations, responsive layouts, and structured navigation for consistent desktop and mobile experiences.
 - Deployed the portfolio as a live web application using GitHub Pages and integrated project repositories and professional links for recruiter access.

ACHIEVEMENTS & CERTIFICATIONS

- Participated in Smart India Hackathon (SIH), working on real-world problem statements and solution development.
- NPTEL Certification: Introduction to Machine Learning.
